📅 2nd May 1994 📍 Panaji - Goa

SUMMARY

- Front-end Developer with 7+ years of experience building user-friendly websites and applications using CSS, React.js, and JavaScript.
- Proven ability to collaborate with UX/UI teams to translate functional specifications into seamless user experiences.
- Experienced in building multi-platform websites using responsive web design.

EXPERIENCE

Frontend Developer

Grassdoor

APRIL 2017 - PRESENT

- Designed and developed a responsive e-commerce website and its corresponding admin portal frontend, with a focus on user experience and SEO.
- Used data from analytics tools to improve the web app by understanding user behavior and acting on those insights.
- Reduced development time by decreasing rework through UI/UX design of various modules/features for mobile and web apps.
- Conducted multiple interviews for web designer and frontend developer roles.
- Managed and mentored a team of 5 developers.

Frontend Developer & Designer

Genora Infotech

AUGUST 2015 - MARCH 2017

- Implemented front-end of websites, admin portals, and web apps using HTML, Angular Material, Vanilla JavaScript, and CSS frameworks like Bootstrap and Foundation.
- Handled UI/UX design for mobile and web apps using Adobe Creative Cloud and other wireframing tools.
- Crafted banners, infographics, and other promotional material for the company using a variety of design tools and techniques.

EDUCATION

Bachelors in Computer Engineering

Padre Conceicao College of Engineering

JUNE 2011 - JUNE 2015

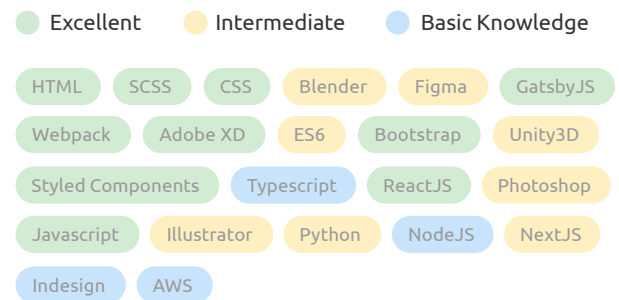

MORE ABOUT ME

- Curious and lifelong learner. I am always eager to learn new things, especially about the latest technologies in finance and machine learning.
- Actively engaged in the tech community. I read blogs, subscribe to newsletters, and attend webinars to stay up-to-date on the latest trends and developments

ACHIEVEMENTS

- Converted existing website into white label website for B2B customers, saving 80% development time for onboarding new customers.
- Engineered shirt-designing tool that seamlessly integrated with mobile phone covers and cups, reducing external vendor dependency by 100%.
- Developed a personal blog using Gatsby JS to share knowledge of the VIM editor and CSS, and to test my technical skills.

SKILLS

TOP PROJECTS

Grassdoor

Grassdoor is a web platform that allows users to place orders for medical supplies and get them delivered at home.

Role: UI designer and Frontend Developer

Technologies Used: ReactJS, NextJS, ES6, Webpack, Bootstrap, Adobe XD, Illustrator

Meet & Greet

Meet & Greet is a platform where users can create blog posts, live events that can then be accessed by other users.

Role: UI designer and Frontend Developer

Technologies Used: PHP, Bootstrap CSS, Javascript, Photoshop, Illustrator

Automated Trading System (Personal Project)

Built a serverless automated trading system that uses AWS Lambda functions to scan daily price data and other market data to come up with trade signals. The system then automatically places orders, squares off trades, and saves trade data to a database.

Technologies Used: AWS, Python, Pandas, Puppeteer, Dynamo DB, AWS CDK, AWS Lambda functions.
