SUMMARY

Frontend Web Developer and UI/UX Designer having 7 years of experience in diverse areas of web development process, prototyping, UX/UI design, user needs research and branding.

Being both Designer and a Developer gives me added advantage in the form of more control over the interface designs and their implementations.

EXPERIENCE

Frontend Developer & Designer

Grassdoor

APRIL 2017 - PRESENT

- Designed and developed a responsive website, its corresponding admin portal frontend for an e-commerce platform keeping in focus the user experience and following strict SEO guidelines.
- Used data from various analytics tools to gauge user behavior and acted upon those insights to improve the web app.
- Handled UI/UX design of various modules/features for mobile and web apps thereby, reducing development time by decreasing rework.
- Conducted multiple interviews for the role of web designer and frontend developers.
- Managed and mentored a team of 5 developers.

Frontend Developer & Designer

Genora Infotech

AUGUST 2015 - MARCH 2017

- Designed and developed frontend of websites, admin portals & web apps using technologies like HTML, Angular Material, Vanilla Javascript, and CSS frameworks like Bootstrap, Foundation.
- Handled UI/UX design for mobile and web apps using Adobe Creative Cloud and other wireframing tools.
- Designed banners, infographics, and other promotional material for the company

Bachelors in Computer Engineering

Padre Conceicao College of Engineering

JUNE 2011 - JUNE 2015

- Final Year project was a game developed using Unity3D game engine

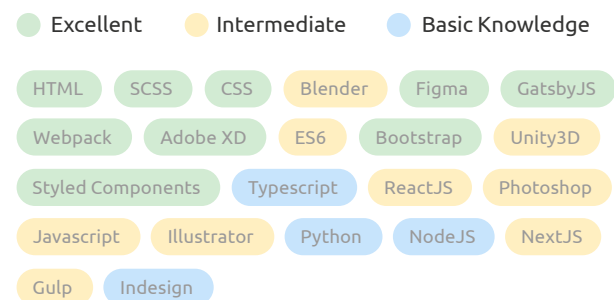

MORE ABOUT ME

- I like to learn new things. I am currently learning about finance and trying to understand machine learning.
- I keep myself updated on various new technologies by reading blogs and subscribing to various newsletters.
- When bored of the above things, I design 3d stuff in Blender.

ACHIEVEMENTS

- Converted the existing website into a white label website for B2B customers. It saved 80% development time for onboarding new customers.
- Implemented a shirt designing feature that extended to cups and mobile phone covers. It reduced the dependency on paid external services.
- Implemented personal blog with the primary aim of spreading knowledge of VIM editor, CSS, and to test personal technical skills.

TECH STACK

TOP PROJECTS

Grassdoor

Grassdoor is a web platform that allows users to place orders for medical supplies and get them delivered at home.

Role: UI designer and Frontend Developer

Technologies Used: ReactJS, NextJS, ES6, Webpack, Bootstrap, Adobe XD, Illustrator
